EASIEST & FASTEST
DETAILING SOLUTION
FOR PROFESSIONALS

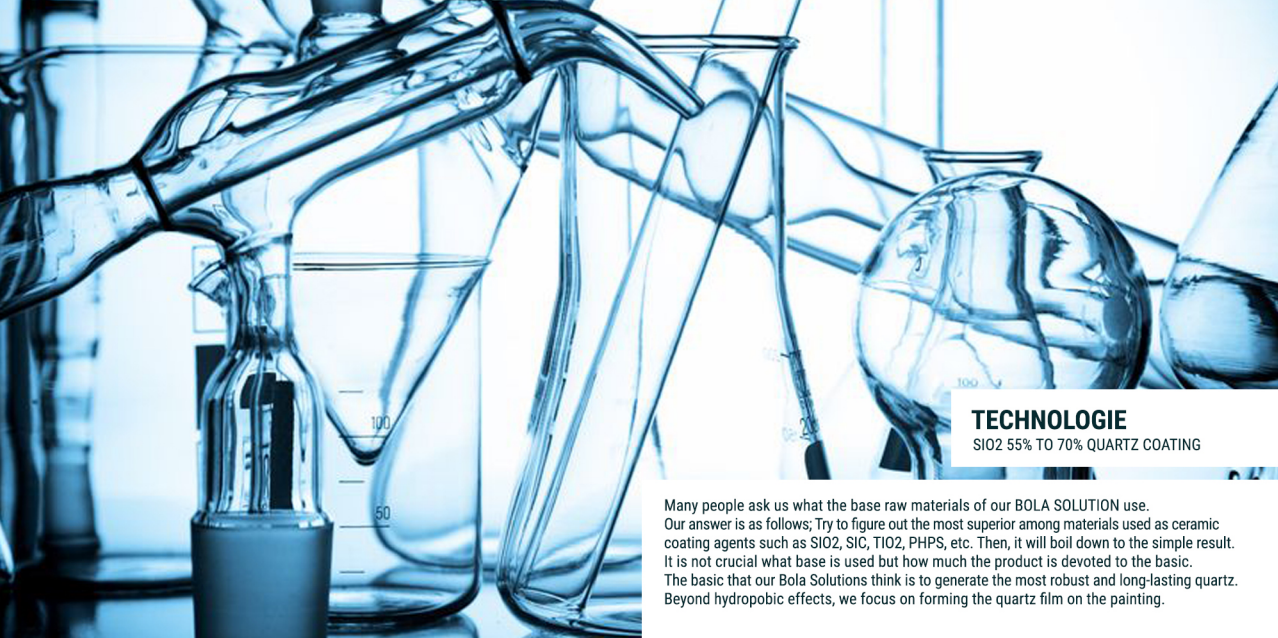

ABOUT BOLA SOLUTION

BOLA SOLUTION was created based on the idea that a car has skin. We always prioritize to support and advise our partners.

HISTORY BOLA SOLUTION brand was launched in 2019, and its holding company, DOXX co. was established in 2006. Based on various experiences in the automotive field, DOXX co. launched Bola Solution, which are the detailing products composed of the most advanced trend and formulation as of now in 2020. With 5-year durability, heat-resisting property more than 300° and performance of beading angle 120°+, we satisfy many customers in the short term and grow rapidly.

The creed of Bola Solution is to supply the clients with premium products produced through Bola Solution technology and cutting-edge mass production system.

TECHNOLOGIE
SiO₂ 55% TO 70% QUARTZ COATING

Many people ask us what the base raw materials of our BOLA SOLUTION use. Our answer is as follows; Try to figure out the most superior among materials used as ceramic coating agents such as SiO₂, SiC, TiO₂, PHPS, etc. Then, it will boil down to the simple result. It is not crucial what base is used but how much the product is devoted to the basic. The basic that our Bola Solutions think is to generate the most robust and long-lasting quartz. Beyond hydrophobic effects, we focus on forming the quartz film on the painting.

AQUA SHIELD 'MAX'

PHPS BASE, BEADING ANGLE 120°

PHPS BASE, BEADING ANGLE 120° & GORGEOUS PERFORMANCE

Impressive Performance AQUA SHIELD 'MAX' focuses on easy construction and performance. Shortcomings of polysiloxanes base coating agents are transformed to strength such as 'convenience' and 'moderate price' through contrarian ideas.

AQUA SHIELD 'MAX' is strongly recommended for customers who value durable water repellency and a sensation of sleekness. It can be appropriately used as a top coat on the hardness-based coating agents such as EVO. It is recommended for construction stores that have not converted from detailing to polishing and coating. It suggests a solution to attract customers who are mesmerized with fantastic workability and performance.

COATING MEETS CONVENIENT WORKABILITY?

WE INCLUDED IT IN THIS

PURE SHIELD 'STD'

WITH THE IDEA THAT CARS ALSO HAVE SKIN,
WE MADE COSMETICS FOR CARS.

PURE SHIELD STD, an abbreviation for standard, is the main ceramic products of BOLA SOLUTION. Since it minimizes interference caused by the work environment, temperature, and humidity, it is considered as a model that has a little deviation in performance.

We're proud of the item that will meet customer satisfaction most conveniently and easily. STD is a product enhancing the reliability of the business site through unparalleled design and sensibility and workability without failure and designed to make regular customers.

Clean & Hard Quartz Coating / Beading Angle 110°
Polysiloxane 55% / Standard of Ceramic Coating

PURE SHIELD 'STD'

POPULARIZE THE PREMIUM

It was a breath-taking result that turned the effect of other companies' products composed of 2Bottles & 3Bottles around into 1 Bottle.

We were able to lower the unit cost of premium ceramic production to half, and 2 – 3 times of repetitive works only to once, which was led to reduce wasted labor. So, we can suggest a reasonable service cost to customers.

PURE SHIELD EVO is a premium ceramic coating products. composed of polysiloxane 70%, the main raw ingredient of quartz coating. The product is a core of exclusive chemistry fusion technology of BOLA SOLUTION that create clear, solid quartz. Beyond the level that creates only clear and solid crystalloid, EVO realizes the top-notch hydrophobic

NOBLE SHIELD 'TAN'

IMPROVE AND PROTECT THE DURABILITY OF NATURAL LEATHER

EXPERIENCE THE
ATTRACTION TAN OF MATT

NOBLE SHIELD TAN of BOLA SOLUTION's leather coating speaks its propensity from its name – it is 'noble.' Regardless of home or abroad, the current propensity of luxury sedan owners is to retain the fabric of the high-quality leather and matt coating products as well.

TAN is strongly resistant to surfactants and has proven it self to last from many numbers of cleaning tasks. Through numerous construction of supercars such as Lamborghini, Ferrari, Bentley, Porsche, etc., it has proven there is no residue or smudge after construction and increase the market share.

The technology that absorbs the raw materials into the leather and creates the flexible coating membrane – that is NOBLE SHIELD 'TAN'

POLY SHIELD 'MOD'

PREVENT EFFLORESCENCE ON THE PLASTIC AND EXPRESS RICH COLORS

PREVENTS PLASTIC WHITENING & EXPRESSES DEEP COLOR

Whoever owns a car, he/she may identify that pitch-dark black colored plastic trim or various rubber molding have turned blurry one day.

The main cause is acid rain gracefully falling from the sky and calcium chloride that is nicely piled up on the road in the winter season.

POLY SHIELD 'MOD' is mostly used for fender molding or Mini Cooper or Zeep vehicle models. In the case of the engine room coating or exterior cares, it gives 6 - 12 months of the protective effect with simple construction. POLY SHIELD 'MOD' is a true solution that satisfies both the construction Detailing Shop and Customers without burden.

Prevents plastic whitening & Expresses deep color

POLY SHIELD 'MOD'

THERMO SHIELD 'DEG'

ESCAPE FROM THE STRESS OF TIRING WHEELS & RIM DUST.

People who are obsessed with wheels are shouting for the appearance of THERMO SHIELD 'DEG' of BOLA SOLUTION.

THERMO SHIELD DEG the combination of THERMO and DEG (a unit of temperature: degree), explains the features of this product by its name.

There is a definite difference in the limit between heat-resisting property proper for the painted surface and wheel coating. If the temperature of the engine room in the middle of the summer is high enough to cook eggs, the temperature of the brake temporarily goes up to 600-700° while sports driving and the heat generated from the brake transfers to the wheels. To prevent the heat from destroying the coating layer, THERMO SHIELD DEG contains heat-resisting raw materials to endure up to about 300°. BOLA SOLUTION will open the era of brilliant wheel coating.

THERMO and DEG (a unit of temperature: degree)
Explains the features of this product by its name.

THERMO SHIELD 'DEG'

RAIN SHIELD 'YPR'

HAVE YOU EVER IMAGINED DRIVING WITHOUT USING WIPERS?

Experience the breath-taking experience that raindrops disappear from sight at 60km/h and the durability that retains from six months to one year.

You can use it on the side-view mirrors and side and rear glasses of vehicles together. On rainy days, it helps drivers drive safely. It is easy to use, and its effect is powerful.

Experience that raindrops disappear
From sight at 60km/h
